About this item

- Designed for **data centers, server rooms, offices, and control rooms** requiring underfloor cable management.
- Provides a **stable walking surface** while allowing easy access to concealed utilities.
- The **anti-static conductive edging** helps reduce electrostatic discharge in sensitive spaces.
- Engineered for **high load-bearing performance**, making it suitable for heavy equipment and high-traffic commercial spaces.
- Modular panel design allows for **quick installation and easy maintenance**, reducing downtime during upgrades or repairs.
